

March 18, 2025

**Title : usually longer than you would expect for a research paper, so make sure it fits**

*Subtitle : shorter than the title*

**Author<sup>1</sup>, another author<sup>2</sup>**

<sup>1</sup>ARAMIS Lab, <sup>2</sup>Another institute

- ① Text
- ② Lists
- ③ Figures and stuff
- ④ Bibliography

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetur id, vulputate a, magna. Donec vehicula augue eu neque.

**This is some bold text.**

*This is some italic text.*

*This is some text with emphasis.*

Typographic advice : never use ***italic bold text*** or underline text in presentation ; also, tend to use the *emphasis* instead of *italic* or **bold**.

You can display some math blocks like this :

$$\mathcal{N}(x \mid \mu, \sigma) = \frac{1}{\sqrt{2\pi\sigma^2}} \exp \left\{ -\frac{(x - \mu)^2}{2\sigma^2} \right\},$$

or also write inline math like this :  $f(x) = \mathcal{N}(x \mid \mu, \sigma)$ .

We can use defined acronyms : their first appearance will feature their definition, such as “Let’s talk about Magnetic resonance imaging (MRI).”

Then, their following appearances will automatically be as acronyms : ”Let’s talk again about MRI.”

Here's a plain frame, without any title.
