

May 27, 2025

Title : usually longer than you would expect for a research paper, so make sure it fits

Subtitle : shorter than the title

Author¹, another author²

¹ARAMIS Lab, ²Another institute

- ① Text
- ② Lists
- ③ Figures and stuff
- ④ Bibliography

Body text font : IBM Plex

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris.

This is some bold text.

This is some italic text.

This is some text with emphasis.

This is some text with strong emphasis.

Typographic advice : never use ***italic bold text*** or underline text in presentation ; also, tend to use semantic commands such as *emphasis* instead of *italic* or **bold**.

Monospace font : IBM Plex Mono.

You can write inline code : `print("Hello world!")`.

And also displays code blocks :

Math font : *IBM PlexMath*.

You can display some math blocks like this :

$$\mathcal{N}(x \mid \mu, \sigma) = \frac{1}{\sqrt{2\pi\sigma^2}} \exp\left\{-\frac{(x - \mu)^2}{2\sigma^2}\right\},$$

or also write inline math like this : $f(x) = \mathcal{N}(x \mid \mu, \sigma)$.

We can use defined acronyms : their first appearance will feature their definition, such as “Let’s talk about Magnetic resonance imaging (MRI).”

Then, their following appearances will automatically be as acronyms : “Let’s talk again about MRI.”

Here's a plain frame, without any title.

- A point
- Another point
- A final point

- ① First point
- ② Second point
- ③ Third point

First First object

Second Second object

Third Third object

Figure 1: A sample figure

column 1	column 2
some stuff here another column	and also there one last cell

Table 1: A sample table

If you use the total frame number option, slides in the appendix won't be counted in the total frames number.
